
CONFERENCE 2026 TECHNICAL WORKSHOPS

Trimble Access Tips and Tricks (back by popular demand!) + Trimble Connected Workflows (see what is all the fuss about!)

AllTerra New Zealand – Wednesday 9 September from 1:30pm til 3:30pm

Join the local **ALLTERRA and Trimble team** for a free tips and tricks session on how get the most out of Trimble Access in combination with GNSS and total station technology.

In addition, learn about the Trimble Connected Workflows and understand how they can benefit the business. From a simple backup for when the controller slides off the roof of the ute, to managing the data exchange with multiple field crews and other disciplines across a complex project, the Connected Workflows offer meaningful benefits to all sizes of companies. We'll even show how you can integrate with ACC and Synergy, to easily get data between those systems to your Trimble gear in the field.

You'll walk away with knowledge that will immediately increase your productivity when you are back at work after the conference.

SURVEY &
CONSTRUCTION
TECHNOLOGY

Global Survey – half day workshop – Auckland

Following the success of last year's Christchurch Technical workshop, **Global Survey** will once again host a half-day workshop ahead of the Survey & Spatial 2026 Conference.

In the spatial world, incredible hardware is only as good as the control network backing it up. This three-hour workshop is a deep dive into the lifecycle of spatial data. We are going to tackle everything from the mathematical heavy lifting of grid-to-ground conversions to the massive datasets generated by modern reality capture.

Whether you are wrestling with datums or drowning in point clouds, this session is about taking back control of your data and delivering absolute confidence to your clients.

Join us from 1pm–4pm on Wednesday 9 September. The venue is Gallery Room 3 at the Cordis Hotel. The cost will be \$100 plus GST. Places for this workshop are limited, so be sure to book early to avoid missing out. [To register please click here.](#)

12d® Model

12d Model Technical One-Day Workshop

After welcoming over 100 attendees, and the outstanding feedback from last year's Christchurch workshop, we're excited to once again host a **one-day 12d Workshop** ahead of the Survey & Spatial New Zealand Conference in Auckland. **Join us from 8.30am to 4.30pm on Wednesday 9th September at Four Points by Sheraton in Auckland (a short walk away from the conference venue).**

Designed for surveying and engineering professionals of all experience levels, the workshop provides an excellent opportunity to expand your 12d knowledge, ask questions, and connect with other users before the conference gets underway.

Workshop highlights include:

- Practical tips and tricks to work smarter in 12d
- Time-saving workflows and productivity tools
- Hidden gems
- Interactive demonstrations and Q&A
- Networking with fellow 12d users

If you enjoyed last year's Christchurch workshop – or missed out and have been waiting for another opportunity – we'd love to see you in Auckland.

Workshop Fee: NZ\$250 + GST per person. Your registration includes a full day of learning, and catering throughout the day. **Places are limited, so register early to secure your spot.** Email us at office@12d.co.nz
